

Make a handle for your pot from clothes hanger wire.

Attach handle with a regular copper rivet.

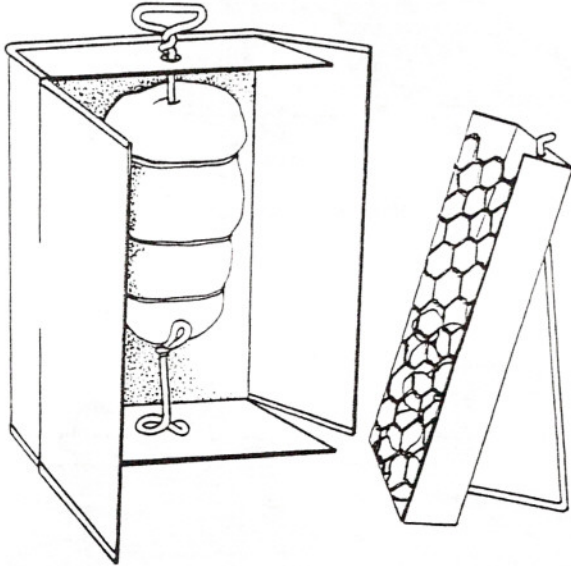

...or use wire triangles, tin strips and split rivets.

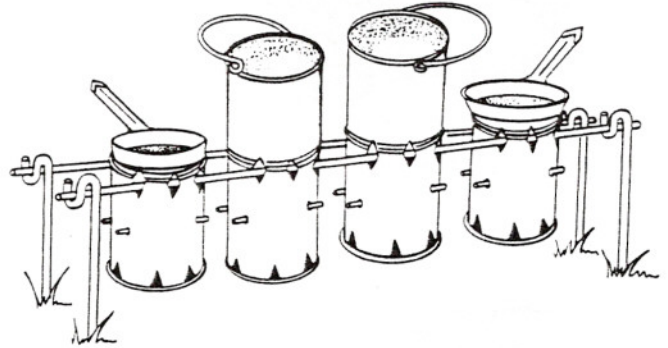

Stove is open at top to enable you to replenish charcoal.

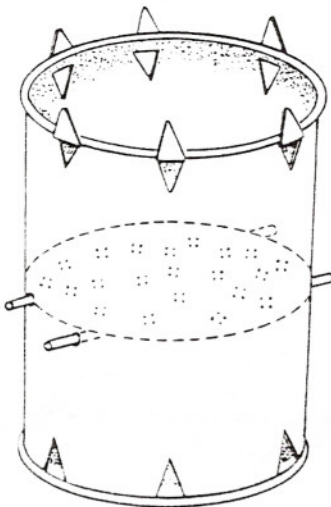

A five-gallon can cut and shaped like this makes an excellent charcoal stove.

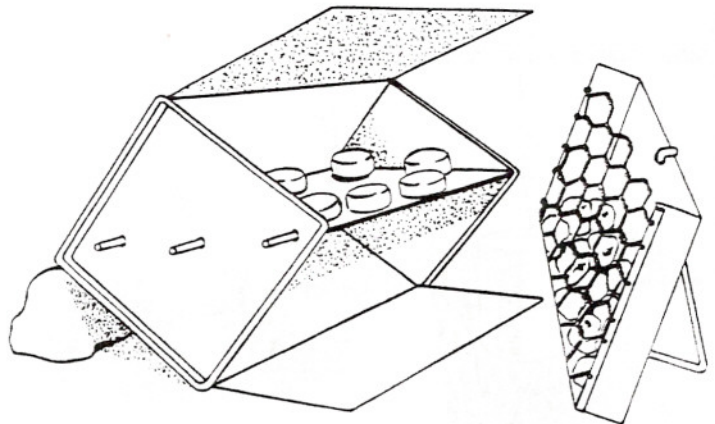

Roast beef in camp — yum-yum!

You can use iron rods for holding a battery of stoves.

To save charcoal, put a grate in your stove.

Here's a good reflector oven for baking. The heat comes from burning charcoal in a shallow bake pan. Chicken wire holds charcoal in place.
